

ABSTRACT OF THE DISCLOSURE

A slip resistant cover for various articles has a central, substantially non-stretchable sheet and a border of a cross-extensible strip around the perimeter of the sheet. The strip can extend incrementally from its relaxed state by at least 150 % under
5 tension of 160 g/cm of strip width or less. Preferably the strip has an open mesh net structure. The slip resistant cover is suitable for covering diverse items, including bedding materials, vehicles, equipment, furniture and the like.
